

Concrete pendant light inLight 01

in|grau

Assembly / operating instructions

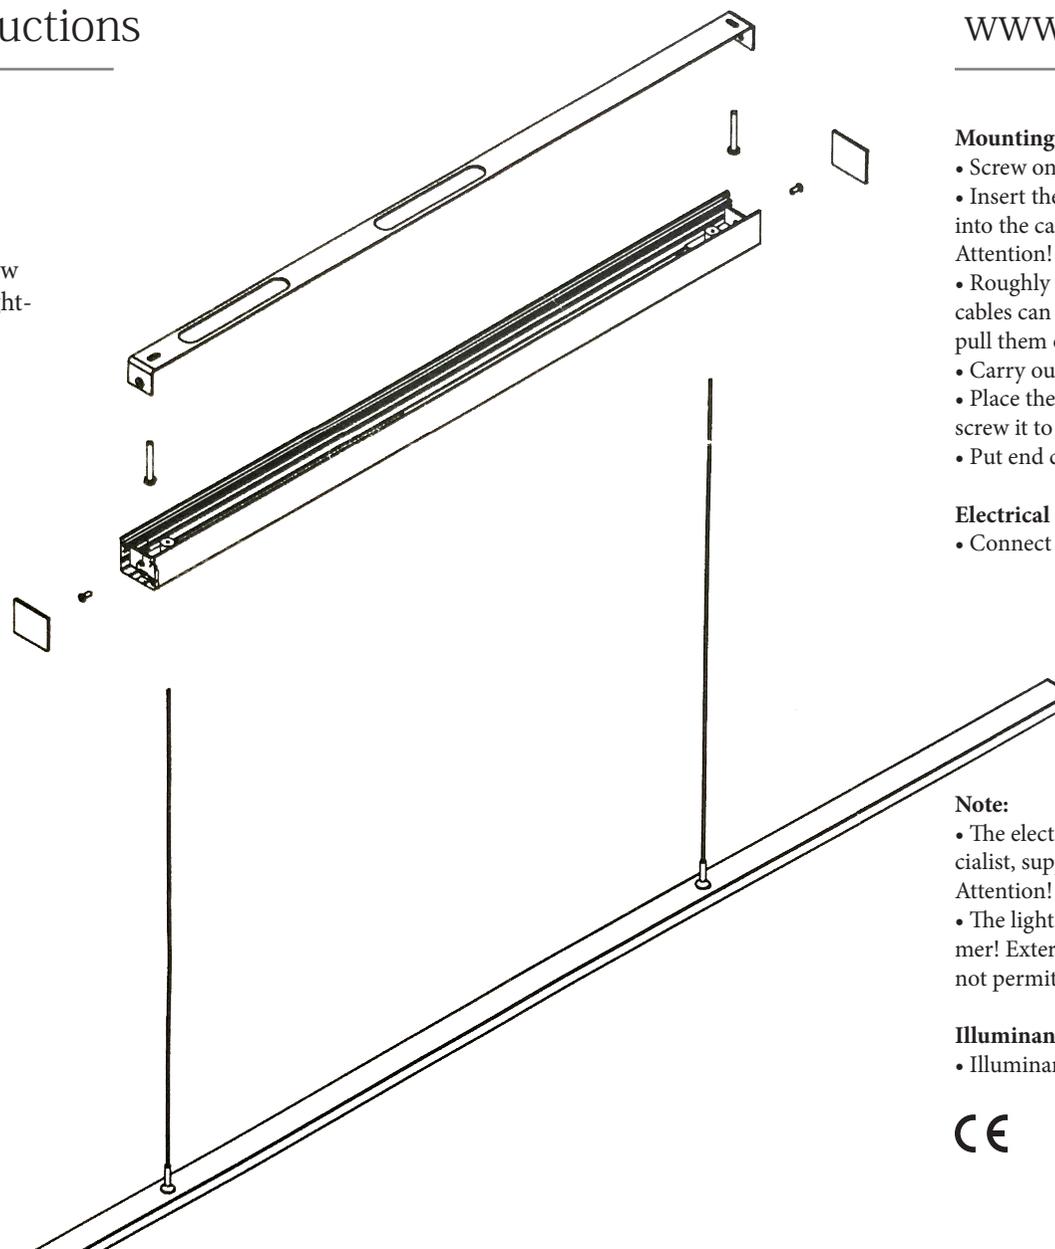

www.ingrau-manufaktur.de

Operation of the sensor switch:

1. switch on and switch off by horizontal hand movement approx. 1 cm below the sensor.
2. dimming by holding the hand approx. 1 cm below the sensor up to the upper or lower maximum brightness value.

Care instructions:

The lamp should be cleaned with a soft cloth.

Mounting the luminaire:

- Screw on ceiling mounting plate
- Insert the transparent cable of the pendant luminaire into the canopy and connect at the marked point
Attention! Observe polarity!
- Roughly pre-set the height of the pendant lamp, the cables can be pushed in continuously, press the tube in to pull them out
- Carry out electrical connection (230V) (see below)
- Place the canopy on the ceiling mounting plate and screw it to the side
- Put end caps on the side (magnetic)

Electrical connection:

- Connect the 3-pole supply line to 230V

Note:

- The electrical connection must be carried out by a specialist, supply voltage 230V/50Hz.
Attention! Do not damage the power cable!
- The light can only be operated via the integrated dimmer! External dimmers like e.g. phase cut/phase cut are not permitted and can cause damage to the luminaire!

Illuminants:

- Illuminants are subject to disposal

CE
