

LIGHTS

INLIGHT 01

OUR INLIGHT 01

The concrete pendant light inLight01 from in|grau brings itself through its extremely elegant design, almost floating in the room design. A clear and straightforward design combined with the latest technology. Each light is truly unique and is cast by hand, processed and then connected to the light body.

With wall thicknesses of less than 5mm, it sets new standards.

Special attention is also paid to the LED technology, which virtually disappears in the concrete body due to its filigree design.

The light is available in two versions. The standard light can be switched on and off and dimmed without contact. The smart light can be integrated into a SmartHome. Furthermore, the smart light can control the color temperature from warm white 2700 Kelvin to cool white 4000 Kelvin. This with or without remote control.

CREATE ... SELECTION

In the range of our inLight01 we offer four different sizes and two different colors and as standard light with dimmer technology or as smart light with remote control and use in SmartHome.

The inLight01 light dimensions:

- inLight 01/100 - 1000 x 30 x 40 mm
- inLight 01/125 - 1250 x 30 x 40 mm
- inLight 01/150 - 1500 x 30 x 40 mm
- inLight 01/175 - 1750 x 30 x 40 mm

The inLight01 colors:

- Concrete grey
- Anthracite

The inLight01 technologies:

- Standard light dimmer, contactless (standard dimmer)
- Smart light without remote control for use in SmartHome (Smart)
- Smart light with remote control for use in SmartHome (SmartControl)
